Innovation: A new vision in the sport of motorcycle racing

Formula Bike is...

- a true competition machine with incredible performance, but of unequalled simplicity
- a new category ranked between the pocket bike and the Grand Prix 125cc
- a promotional concept accessible to all where only the rider's talent makes the difference
- the guarantee of total sporting equity
- the simplest way to begin in the sport of motorcycle racing at an unbeatable price
- the possibility of competing with rider's worldwide in the *Formula Bike World Cup*
- a motorcycle ideal for leisure offering great sensations!

Powerful, simple, reliable and economic

With over **40 HP**, a speed dash that can exceed **180 km/h**, and built with the latest techniques and materials, the **Formula Bike** is the only machine in the world combining performance, simplicity and reliability. Its steel frame, made of tubular lattice, and aluminum swing arm, designed like Moto GP's, offer great rigidity and allows very fast performance in curves. Motorized by powerful TM K9B, the **Formula Bike** is a true 'small jet of the tracks'!

Moreover, its price and extremely low operative cost make the **Formula Bike** a very interesting series for apprentice riders or for all those seeking strong sensations of the mechanical sports at a **low cost!**

Chassis specifications

Frame	Multi tubular hand welded and aluminum swing arm
Front suspension	Fork PAIOLI F32S
Back suspension	mono shock absorber BOS
Front wheel	GRIMECA 14 inches (120/70/14)
Back wheel	GRIMECA 14 inches (150/70/14)
Wheelbase	mini 1180 mm +/- 10 mm
Saddle height	760 mm
Weight	78 kg
Fuel tank capacity	8 l

Engine specifications

Type	One-cylinder 125cc – 2 Strokes
Cylinder	125cc
Power	approx. 42HP
Boring X Stroke	54 x 54.5 mm
Clutch	dry
Exhaust	rolled and hand welded with Aluminum/ Carbon cartridge
Radiator	Aluminium
Ignition	PVL

The new definition of motorcycle sport

Jacques Marilley, impassioned by motorcycle competition and president of Marilley Motosport company, imagined the **Formula Bike** concept. The **Formula Bike** machine was developed to satisfy a lack in the sport of motorcycle road racing between the pocket bike (minimoto) and the 125cc GP.

Its goal is to attract young people to motorcycle road racing with a machine that is:

- simple in design and performance
- very powerful
- financially affordable
- fun

The **Formula Bike** is an incredible educational tool for national federations.

Formula Bike has a mission: to make motorcycle road racing competition popular among young people, and to offer future purchasers a genuine competitive machine developed with the best technological means of today; with the benefits of a manufacturer active in motorcycle competition for many years.

Constructor

- Marilley Motosport

Technical partners

- TM Racing
- BOS
- Grimeca
- France équipement
- Serra Racing Radiators
- Paioli

Just start. **Be a champion!**

Formula Bike World Cup: The category where only the rider's talent counts!

A monotype category is always a pledge of technical equity between the competitors. With adjustments imposed by the manufacturer, the participants in the **Formula Bike World Cup** only have their talent to make the difference.

On the technical level, all **Formula Bike** machines are 100% identical. Today, becoming the world's best rider is a dream accessible to all.

The **Formula Bike World Cup** proposes:

- a universal and neutral basic category
- a category where everyone is on the same equal footing
- a category where money cannot make the difference
- a category which does not require particular technical training
- a category where only the pleasure of piloting is important

At the end of each season the top three riders from each participating national **Formula Bike** championship are invited to compete for the **Formula Bike World Cup** title on a neutral track. Highly valuable prizes are awarded to the winning rider.

Feel the unique sensations of a Grand Prix rider!

The **Formula Bike** is very powerful, highly reliable, and most importantly, very easy to use. It is the ideal machine to familiarize oneself with motorcycle road racing on a closed track.

At ease on all types of layouts, the **Formula Bike** will allow all its users to put themselves in the seat of a Grand Prix rider.

The principal objective of the **Formula Bike** is to make motorcycle road racing popular and accessible.

To feel extreme sensations without having a technical mechanic's knowledge, the **Formula Bike** is a low cost machine designed to attract young people worldwide motorcycle road racing.

Just start. **Be impressed.**
